

Project Overview

As of July 15, 2013

Current conditions on Hard Road - Phase A segment

Hard Road – Phase A, Sawmill Road to just west of Smoky Row Road

Description and Benefits: Phases A, B and C will widen Hard Road from two lanes to five between Sawmill Road and State Route 315. Phases B and C are now complete. Phase A is approximately 1.2 miles in length. Planned improvements include curbs, sidewalks, street lighting, storm sewer, traffic signals, signs, pavement markings and bike lanes. With an increase in residential development, widening of Hard Road was deemed necessary in order to decrease traffic congestion and improve pedestrian movements within the project limits.

Schedule:

Design in progress; will begin right-of-way acquisition in 2013 and utility relocation starting in summer 2013. Construction is set to start in spring 2015 and finish in winter 2016. Property owners affected by the project will be notified in August 2013.

Estimated Costs:

Design	\$1,200,000
Right-of-way acquisition	1.7 million (estimate)
Construction and inspections	15 million (estimate)

(Funded primarily by the MORPC with some City of Columbus dollars)
